## Narberth Joining Campaign Against Jap Beetle

### Civic Association Issues Warning and Advice to Residents

Narberth has joined the other Main Line towns in a vigorous campaign against the Japanese Beetle.

The Narberth Civic Association, in co-operation with other towns, has secured valuable information on methods of combatting the pest, much of which is printed below.

The beetle is in town, a number of residents reporting them in their gardens. Immediate steps are necessary to prevent further spread in the borough.

**WHAT THEY ARE:** About one-quarter inch long, has six legs, bronze iridescent hard shelled wings with green edges, and a dark green head.

**WHAT THEY DO:** Every beetle eats daily many times its weight, and feeds on leaves, flowers, grass and fruit.

**WHAT YOU SHOULD DO:** The Japanese beetle is sluggish in the morning and late afternoon. Children can knock them from bushes into a jar containing a little water and kerosene. They can be shaken from large bushes and trees onto cloths spread on the ground and then destroyed.

The Government Agricultural Station at Riverton gave us these directions for protecting vegetation and destroying the beetle:

For shade trees, apples, grapes, cherries, roses, etc., mix 1 oz. lead arsenate powder and 1 oz. wheat flour, add enough water to make a paste, mix with 1 gallon water and apply with hand spray or bucket pump, preferably the latter. (For large quantities use 3 lbs. each lead arsenate and flour and 50 gallons water.)

For peaches, plums and other stone fruits use half strength and add 1 oz. fresh slaked lime or one and one-third oz. hydrated lime per gallon of water.

**WARNING:** In two or three weeks these beetles will go into the ground and deposit their multitudes of eggs for next year's horde.

The time to act is NOW.

This menace is very serious.

Caution—Lead arsenate is a POISON.

In Narberth observations show that the beetle shows a preference for grape vines, roses and hollyhocks. These plants form the best hunting grounds for householders looking for the first appearance of the pestilence.

Residents away on their vacations, most of whom receive "Our Town" at their temporary addresses, are urged to write home and make provision for the protection of their properties. The beetle will soon be laying its eggs for the new generation, and preventive measures must be immediate.

#### General Information.

From authoritative sources, we have secured considerable information about the beetle. The following excerpts will merit the careful perusal of every resident—in fact of every suburbanite in this district which is now on the "firing line."

#### How It Arrived.

It is well known to entomologists that many if not most of our more serious insect pests are not native to this country, but have been introduced through accidental means into the country from their native homes. The Japanese beetle is not an exception to this, since it is an insect native to Japan, and was introduced into the United States at Burlington county, New Jersey, probably prior to 1916.

Since the time of its finding in 1916, the insect has not only extended the area which it covers up to a total of approximately 2400 square miles, but the increase in density of the insect in the infested territory has been truly remarkable. Since that year the spread in Pennsylvania has been relatively uniform from year to year, averaging from five to 15 miles outward in an air line, from the original centre of infestation.

#### Means of Spread.

The beetle is a strong flier and is capable of dispersing itself over considerable distances. From the standpoint of the country at large,

however, danger of spread over wide area is not because of the average yearly natural spread but because of the fact that the insect may be accidentally distributed over wide areas through artificial means.

The insect might be carried in the adult stage on certain types of farm products, especially sweet corn, cabbage, lettuce or similar plants offering satisfactory hiding places for the insect. The passage of vehicles of one sort or another through the infested territory during the period of beetle flight is still another means by which the insect may be carried for comparatively long distances, and, in fact, instances have been noted where one or more individual beetles have been discovered on or in automobiles passing through the infested territory.

#### Food Habits of the Beetle.

The Japanese beetle is most conspicuous and injurious in the adult stage by reason of its injury to foliage and early ripening fruit. It is practically omnivorous, feeding on the foliage of weeds of many kinds, small fruits such as grape and blackberry, fruit trees such as apple, and sweet cherry, ornamental shrubs, particularly althea and rose, flower garden flowers of all kinds, field crops such as clover blossoms, soybeans and corn, and shade and timber trees including linden, birch, oak, elm, horse chestnut and willow.

The feeding is characteristic and compares with the eating done by native leaf-chafers. Plants are not defoliated as by certain related beetles, such as the brown May beetle, but the foliage is skeletonized and when severely eaten the leaves turn brown and drop. In the case of flowers the petals are eaten and the blossoms riddled as by the rose beetle or chafer; in fact, the work of the Japanese beetle in flowers and foliage closely resembles that of the chafer, except that it is usually more severe, many more kinds of plants are attacked, and the feeding extends over a longer period.

Something over 200 different species of plants are known to be attacked to a varying degree by the Japanese beetle, and in this list are included practically all kinds of economic and non-economic plants growing throughout the infested territory.

#### Recommendations for Control.

The following recommendations for control are based on investigations covering a period of several years, and represent the most satisfactory methods as yet evolved. It is hoped and generally believed that better methods of handling the problem will be developed, but meanwhile the adoption and following of the recommendations given herewith should insure a reasonable degree of protection from the attack of the insect.

**Materials Used.**—Three pounds of powdered arsenate of lead, two pounds of flour, 50 gallons of water. Mix the arsenate of lead and flour dry, then add water to make a paste, dilute and strain into spray tank; this prevents lumps forming.

**When to Spray.**—In order to protect the foliage and fruit from the attacks of the beetles it is necessary to have the spray applied before infestation takes place. To obtain the desired results, the application of the sprays must be completed not later than June 25. Growers should arrange their spraying operations to have their beetle sprays applied by that date. In case of heavy rains washing much of the spray off the plants, it may be necessary to repeat the application 10 days or two weeks later after the first spraying in order to maintain a coat.

**How to Spray.**—A thorough job of spraying must be done to protect your plants and control the beetles. This means that the foliage and fruit must be completely covered by a film of spray. Unless this is done, your time and money will be wasted, since the beetles will attack the unsprayed portions of the plants and may concentrate on the fruit.

## Boy Scouts Return From Delmont

### Local Troop Reports Fine Time in Camp

The Boy Scouts who have been enjoying a week's vacation at Camp Delmont made a noisy return to their home town last Saturday afternoon. Although they had a grand and glorious time, the old saying of "No place like home" was apparent in the actions of all the returning Scouts.

The troop, numbering 19 when they departed returned with but 15 members, the remaining four having deserted at the last moment. Later radio communication revealed that these members had been located in the dense woods and came from cover when the track was clear and surrendered to the camp officers on condition that they be allowed to enjoy another week's stay, which proves that the camp is by far the best managed and equipped in this part of the country.

That it was a "RIP" of an enjoyable week will be freely admitted by all the Scouts who took the trip. The various schedules of amusements, sports, Scout tests, etc., as arranged by the camp directors, kept the boys on the jump all the time (which explains why some of the loving parents failed to receive letters from their boys when due). The most popular recreation were the morning and afternoon trips to the old swimming hole.

Wednesday evening, July 30, was designated as Narberth Night at which time our Scouts were to furnish the entertainment for the camp. Mr. Fred C. Patten, Major Thomas and Mr. Burnside made a flying visit to the camp and furnished an enjoyable evening with Mr. Patten's music, Mr. Burnside's stories of western life and Major Thomas' tales of the Philippines.

A number of the troop took part in the portrayal of the Indian story, "The Dance of the White Caribou," on Thursday evening, which was realistically enacted, all participants doing their best to that end. We trust that Chief Donaghy will be very lenient should any of these Scouts be taken before him for actions becoming only to wild Indians.

#### On Trip to Canada.

Mrs. Henry Rose, of Woodside avenue, accompanied by Miss Agnes Rose and Master Seaver Rose, are on an eight weeks' trip to the Great Lakes and Canada.

During their absence Mr. Rose and his son, George, are keeping bachelor apartments. Street Commissioner Suplee has made plans for a special collection to haul away the empty cans and egg shells.

#### Mr. Leitch Promoted.

At a meeting of the Board of Directors of the Merion Title and Trust Company of Ardmore, Pennsylvania, held August 6, 1924, Mr. L. Stanley King, of Cynwyd, was elected director to fill the vacancy on the board caused by the death of Mr. J. Walter Myers.

At the same meeting Mr. Daniel Leitch, assistant treasurer, was elected treasurer. Mr. Leitch is manager of the Narberth branch.

#### Repairing Streets.

The annual dressing up of Narberth's streets is now in full swing. Street Commissioner Suplee is supervising the laying of a coat of light tar and crackle stones. The holes in the roads caused by the frosts are being repaired.

The work is being done quickly, as this part of the borough's activities must be finished before the beginning of the winter ash collection schedule.

Yes, despite the thermometer, it is only six weeks to frost.

#### Boy Scouts.

The first official meeting of the Boy Scouts will take place at headquarters on the second Monday evening in September, but one or more Scoutmasters will be on hand every Monday evening, except on Labor Day, to pass on Scout tests from all those Scouts desiring to take same.

## The FIRESIDE

Dahlias are now coming into their own in local flower gardens.

Mr. Walter J. Odiorne and family, of Merion avenue, are spending the month of August at Ocean City, N. J.

Messrs. Ray Weiss and Maurice Lacey, accompanied by their respective families, are on a motor trip to Niagara Falls and Canada.

Mr. Warren R. Tyson, of Woodbine avenue, has returned from a trip to California.

Mr. James A. England, of Sabine avenue, accompanied by his daughter, Miss Elizabeth England, were the guests for several days at the cottage of Mr. and Mrs. F. W. B. Humes at Cape May.

Mr. George E. Becker, of Forest avenue, is on a two weeks' camping trip in the vicinity of Indian Lake, in the Adirondacks.

Mr. William Caney is visiting his sister, Mrs. C. H. Nold, of Wynnedale avenue.

Miss Mary Murphy, of Worcester, Mass., is the guest of Miss Mary Macintosh, daughter of Mr. and Mrs. George Macintosh, of Grayling avenue, who plans to accompany her guest to her home, where she will spend the remainder of the month.

Mrs. E. K. Bauer, of Iona avenue, entertained a number of friends Thursday afternoon in honor of her guest, Miss Laura Peters, of Oak Lane.

Mr. and Mrs. John F. Bischoff have sold their home on Dudley avenue and are moving to Ambler, where Mr. Bischoff is in business.

The Misses Elva Vinsinger and Ruth Tatman are the guests of Mrs. Ralph S. Dunne.

The house of Mr. Warren Tyson, on Woodbine avenue, has been purchased by Mr. George Markle. Mr. Markle, who recently sold his property at the corner of Narberth and Haverford avenues, will move to the Woodbine avenue house, while Mr. Tyson has purchased a home on Montgomery avenue.

Mr. and Mrs. Clifford Narrigan and their son, Clifford, Jr., of Windsor avenue, are spending a short time at Asbury Park.

Mr. Nelson C. Rowley, of Chestnut avenue, who broke his ankle several weeks ago while playing golf at the Brookline Square Club, is able to be about again.

Mrs. Walter Sawyer's mother, Mrs. Powers, has returned from a visit of several months in Pittsburgh.

Mrs. Fred Walzer, Mrs. John A. Miller and Mrs. Taylor Henry have returned from a trip to Ship's Bottom, Beach Haven, N. J.

Mrs. William Livingston, with her son, Douglass, have left for a vacation of several weeks in Connecticut and Massachusetts.

Mrs. Helen G. Ohl, formerly of Overbrook, and her children have taken the home on Chestnut avenue formerly occupied by Mr. and Mrs. Edgar S. Taylor. Mrs. Ohl is a dog fancier and is the owner of a number of very valuable animals.

Miss Helen Gannon, a former resident of Narberth, has been visiting friends here for the past two weeks.

Officer Nicholas DeBona, of the Narberth police force, is on his vacation.

Richard Odiorne will spend this month in camp at Kineo, Moosehead Lake, Maine.

Mr. and Mrs. John Dwyer, of 108 Avon road, accompanied by their niece, Sara Burgess, of Hampden avenue, motored from Bryn Mawr Tuesday morning to Pittsburgh, St. Louis, Indiana and Illinois.

Mr. Horace T. Smedley is on a short trip to Boston.

Miss Elizabeth Van Horn, of Mercerville, N. J., has returned to her home after spending six weeks with her aunt, Mrs. S. E. Jeffers, of Forest avenue.

Miss Sara McCord, of Elverson, Pa., is the guest of her cousin, Miss Evelyn Jeffers.

Miss Helen Shand has returned from a tour around the world. She has with her as her guest several friends from Australia.

Mr. George N. Gill, of Dudley avenue, was the guest of honor at a surprise party staged for him by Mrs. Gill on Thursday evening. The affair, which was a stag, was attended by about a dozen friends, who presented Mr. Gill with an attractive, and, be it said, useful present.

Mrs. Franklyn Dunlop is visiting Mr. and Mrs. William Greenway, at Green Pond, N. J.

#### BASEBALL

Narberth climbed into undisputed possession of first place in the Main Line League last Saturday by handing Berwyn an 8 to 2 defeat on the Playground Field.

The game was a tight one at 2 all until the sixth inning, when the local bambinos broke through the pitching of Redmond and took a big lead.

Bobby Gibson pitched the entire fray for Narberth and added 12 more strike-outs to his large list. Six scattered hits were all the westerners were able to collect. Narberth collected 14 safeties from the offerings of Redmond and Paste.

Kane, a new member of the local team, led the hitting with three singles. Harvey Humphries had two doubles to his credit, Vernon Fleck, two singles and Gibson, two singles. Redmond had the only three-bagger of the game to his credit.

By assuming the lead, Narberth bids fair to capture the second-half pennant in as summary a manner as the first gonfalon was lifted. If this takes place, there will be no Main Line League World's Series, and Narberth will have to look to another league for an opponent for a post-season series.

Manager Walzer declares that the team is all set for a clean sweep, but that if such is the case, some real baseball will be forthcoming after Labor Day.

#### Twilight Game.

Narberth won another twilight game Wednesday by sending the star Purchasing Department team of the P. R. R. home with the small share of 4 to 1 score. Vernon Fleck held the visitors to five scattered hits, while his team-mates were playing their seven safe ones where they would do the most good.

George Babb and Charley Humphries led the local onslaught with two each.

#### Next Wednesday.

The fast East Lansdowne Club of the Delaware County League will try their luck on the Playground Field next Wednesday. They handed Narberth a defeat on the Lansdowne grounds last month, and a goodly crowd of rooters is

(Continued on Second Page)

#### Granted a Charter

Montgomery County Court granted a charter to the Martin's Dam Club, recently organized, and which acquired the Martin's Dam property in Upper Merion township near King-of-Prussia.

The object of the organization is for social purposes, with especial reference to swimming in the beautiful lake, of crystal spring water, located in a wooded notch and fronting on two roads.

Humbert B. Powell, of Wayne, is president of the club. The other members and officers are from that section.

To protect the property the court on petition of the organization—which petition was presented by Attorney C. Townley Larzelere—has appointed Howard E. Adams to act as night watchman, with the rights and privileges of a police officer. The appointment is for one year and the pay to be borne by the club.

## Successful Tournament Closes

### Gilpin Wins in Singles; Narberth Pair in Doubles

The Pennsylvania Clay Courts Championship Tournament, held at the courts of the Narberth Tennis Association, ended last Saturday when Sam Gilpin, of the Belfield Club, won the title from Harold Colburn, representing Cynwyd.

The final match ended a highly successful week's tourney, in which over 70 players were entered. The management of the entire affair reflected great credit on the local club, and unstinted praise was heard from the many guests.

Gilpin's worst opponent was an infected callous about the size of a silver dollar on the sole of his right foot. The actual opponent was Harold Colburn, who represented the Cynwyd Club.

Gilpin fought an uphill battle continually, for Colburn's accuracy, combined with the hindrance of his injured foot, were indeed a detriment.

After easily winning the first two games in the first set, Gilpin slumped and when the count was 3 to 1 in his favor he slipped and lost three games straight. He attempted a comeback by winning the eighth game at love, but he lost the final two games after carrying Colburn to deuce both times.

At the outset of the second set Gilpin's foot was paining him frightfully, for he could win but one game, and that also was a love affair. The score for the first two sets was 6-4, 6-1 for Colburn.

The third set went nip and tuck, but up until the tenth game only one had gone to deuce. When he had evened the count at five all he ran the set out at 7-5.

Colburn had won the three opening games of the next set, but when Gilpin was 4-1 in the hole he copped four straight to lead the Cynwyd star, 5-4. Again the game seemed sawed, but finally Gilpin surprised all present by taking the set, 8-6.

Gilpin opened the service of the fifth set and each player won his own service up until the sixth, when Gilpin broke through Colburn's serve to take the lead, 4-2. One more game went to Colburn before Gilpin had won the game, set, match and tournament amid the applause of the gallery.

In the doubles semi-finals Harold Lane, of Narberth, and Tom Leonards, Penn. A. C., defeated Harold Colburn, Cynwyd, and Norman Bramall, Idle Hour, in straight sets, 6-2, 6-3, but Buddy Mann and "Mit" Harlan, both of Merion, had a harder job in defeating Paul Gibbons, Penn. A. C., and Van Dyke Johns, Narberth. The final score of this match was 6-3, 3-6, 6-2. Mann and Harlan clashed with Lane and Leonards in the final, the latter, both Narberth players, winning 6-4, 3-6, 6-2, 4-6, 6-1.

#### KARL R. PETERS

Karl R. Peters, widely known as an automotive engineer and inventor, died suddenly last Friday night at his home, Woodbine avenue, Narberth. Mr. Peters, who was forty-four years old, succumbed to a heart attack while he was alone in his home and was found dead by his wife a short time later.

Born in Berlin, Germany, Mr. Peters was educated in the Technical High School there and then entered Heidelberg University, from which he received degrees as mechanical and chemical engineer. He came to this country in 1910 and located in Philadelphia in 1913. Under the firm name of the Peters Engineering Company, at Thirty-third street and Woodland avenue, he engaged in the designing and building of special types of automotive engines and new processes of refrigeration. He was the inventor and designer of the Peters tricar.

At the time of his death Mr. Peters was working on an invention for a new system of spraying paint without the use of compressed air. He was a member of the Engineers' Club and several mechanical societies in Germany.

Funeral services were held at his home Tuesday evening. He was buried in Hazardville, Conn., the former home of his wife.

# OUR TOWN

## OUR TOWN

A Co-operative Community Journal

Published every Saturday at Narberth, Pa.  
The Narberth Civic Association, Owners.  
Philip Atlee Livingston,

### PASSING 'EM ON HILLS

Unlawful and Dangerous Practice  
Causes Numerous Accidents.

In the frequent accounts of auto-  
mobile accidents it is noticeable  
that many of them are caused by  
drivers cutting out of line and at-  
tempting to pass the car ahead while  
ascending hills or traveling on  
curves in the highway. It is a viola-  
tion of the State automobile law  
to do that, even if a person took the  
trouble to watch on any hill or curve  
on the public highways, it is safe to  
say that he would see the law viola-  
ted by one out of every three or  
four machines.

Most motorists speed up their ma-  
chines as they approach a hill and,  
as some machines have much great-  
er speed than others, the drivers of  
the faster cars find themselves  
forced to slow down a little when  
they pull up close to the slower cars  
or trucks ascending the incline. At  
that moment comes the temptation  
to pull out of line and pass the car  
ahead.

Especially dangerous is it to do  
this when approaching the top of  
the hill. Another machine may be  
approaching the crest of the hill  
from the opposite direction and as  
the drivers cannot see whether they  
have a clear road, a collision is al-  
most inevitable.

It may cause a little delay to  
drivers to stay in line when going  
up hills or around curves, but it is  
always safer to lose the little bit of  
time—never more than five minutes  
—that it requires, than to cut in  
front of a car coming in the op-  
posite direction and take the chance  
of injury and death to yourself or  
those riding with you.

### ISSUE MORE THAN 12,000 DOG LICENSES

A total of 12,373 dog licenses  
for 1924 have been issued up to  
the present time in Montgomery  
county by Country Treasurer Brad-  
man. This is 1000 less than the  
number issued in the whole of 1923.

In quoting these figures, Leo L.  
Lynn of Bristol, field agent in Bucks  
and Montgomery counties for the  
State Bureau of Animal Industry,  
indicated that a number of prosecu-  
tions will result if owners of dogs  
who have not obtained licenses and  
do not otherwise comply with the  
State law concerning dogs fail to  
fall into line.

Arriving in Norristown to check  
up on unlicensed dogs, Mr. Lynn  
said he found conditions in Norristown  
and other sections of Mont-  
gomery county about on a par with  
other places in the State, with quite  
a few stray dogs and dogs which  
have owners but not licenses run-  
ning around loose.

An opportunity will be given all  
owners wishing to do so to obtain  
licenses, he said, and in event of this  
not being done prosecutions will be  
brought and stray dogs will be  
rounded up and killed. A fine and  
costs, including the cost of a license,  
is usually the penalty imposed, Field  
Agent Lynn said.

The total of licenses issued to  
date in the State is 386,000, an in-  
crease of 65,000, in addition to  
which 2668 kennel licenses have  
been issued. So far this year there  
have been 3540 prosecutions, 3720  
dogs killed and 607 claims filed for  
damage done by dogs, for a total  
of \$24,077.89.

### AN ORDINANCE TO ESTABLISH BUILDING DISTRICTS AND RE- STRICTIONS APPROPRIATE TO SUCH DISTRICTS, DEFINING THE CHARACTER OF BUILD- INGS, FIXING THE LOCATION OF BUILDINGS, AND ESTABLISHING REGULATIONS FOR THE HEIGHT AND BULK THEREOF.

THE COUNCIL OF THE BOROUGH  
OF NARBERTH DOES ORDAIN:

SECTION 1. From and after the  
passage of this ordinance the Borough of  
Narberth shall be divided into three dis-  
tricts, the first two of which shall be  
known as business districts, and the third  
thereof as a residence district. Within  
the confines of such districts there shall  
not be erected, altered, reconstructed, re-  
moved into, or maintained any building  
except dwellings, tenements, private and  
public garages, business buildings, edu-  
cational buildings, amusement buildings  
and public buildings.

District No. 1. The limits of District  
No. 1 shall be as follows: Beginning at  
the intersection of the northern property  
line of the Pennsylvania Railroad Co. and  
the eastern line of Narberth avenue,  
thence along a line parallel with the cen-  
tre line of the railroad westerly to a  
point on a line parallel to and two hun-  
dred feet (200) westward from the cen-  
tre line of Essex avenue, thence north-  
westerly along said line for a distance of one  
hundred and thirteen (113) feet, thence  
eastward at right angles a distance of  
fifty (50) feet, thence northerly along a  
line parallel to and one hundred and fifty  
(150) feet westward from the centre line  
of Essex avenue to a point on a line  
parallel to and one hundred and seventy-  
five (175) feet southward from the centre  
line of Windsor avenue, thence easterly  
along said line to a point on a line paral-  
lel to and one hundred and twenty-five  
feet (125) eastward from the centre line  
of Narberth avenue, thence southerly  
along said line a distance of eighty-seven  
(87) feet, thence easterly along a line  
parallel to Windsor avenue a distance of  
twenty-five (25) feet, thence southerly  
along a line parallel to Narberth avenue  
to the southern side of Haverford ave-  
nue, to a point on the eastern side of  
Narberth avenue, thence along said eastern  
line of Narberth avenue southerly to the  
place of beginning.

District No. 2. The limits of District  
No. 2 shall be as follows: Beginning at a  
point on the centre line of Hampden ave-  
nue one hundred fifteen feet southward  
from the intersection of the centre line  
of Woodbine avenue with the centre line  
of Hampden avenue, thence northerly  
along the centre line of Hampden avenue  
to a point on a line parallel to and three  
hundred fifty feet (350) northward from  
the centre line of said Woodbine avenue,  
thence easterly along said line to a point  
on a line parallel to and one hundred  
twenty-five feet (125) eastward from the  
centre line of Iowa avenue, thence south-  
ward along said line to a point on a line  
parallel to and one hundred fifteen (115)  
feet southward from the centre line of  
said Woodbine avenue, thence westerly  
along said line to the place of beginning.

District No. 3. Those portions of the  
Borough of Narberth not included within  
the business districts shall be known as  
"Residence Districts" and within the con-  
fines of which there shall be erected, al-  
tered, reconstructed, removed into or  
maintained no buildings except dwellings,  
tenements, private garages, educational  
buildings and public buildings.

SECTION 2. Heights of buildings.  
Residence Districts: In residence dis-  
tricts the heights of buildings shall be as  
follows: Private garages shall be not over  
one story; dwellings not over two stories  
except that a third story may be built  
within sloping roof; tenements not over  
three stories or thirty-five feet in all;  
all other types not over two stories or  
thirty-five feet, excepting towers on pub-  
lic buildings.

Business Districts: In business dis-  
tricts the heights of buildings shall be as  
follows: Business buildings shall be not  
over four stories or forty-five feet; dwell-  
ings or tenements three stories or thirty-  
five feet; educational and public build-  
ings and garages two stories or thirty-five  
feet; amusement buildings one story or  
thirty feet.

SECTION 3. Areas of lots and front-  
ages.  
Residence Districts: In residence dis-  
tricts no lot shall be of less width between  
side party lines than twenty-five feet at a  
point twenty-five feet from the centre of  
the street and no lot to have an area of  
less than twenty-five hundred square feet  
not including street.

Business districts: In business dis-  
tricts no lot shall be of less width than sixteen  
feet six inches between side party lines  
at a point twenty-five feet from the centre  
of the street and no lot to have an area  
of less than one thousand square feet, not  
including street.

SECTION 4. Open spaces.  
Residence Districts: In residence dis-  
tricts where dwellings or tenements are  
erected on any lot there shall be kept and  
maintained an open space not less than  
sixty-five per cent. of the total area of  
the lot, except, however, that where a  
tenement is erected on a corner lot with  
two street frontages, the open space may  
be not less than fifty-five per cent. of the  
total area of such lot. Where educa-  
tional and public buildings are erected on  
any lot, an open space shall be kept and  
maintained of not less than fifty-five per  
cent. of the total area of such lot, pro-  
vided, however, that where educational and  
public buildings are erected on a corner  
lot with two street frontages, the open  
space shall be not less than fifty per  
cent. of the total area of such lot.

Business Districts: In business dis-  
tricts where dwellings and tenements are  
erected on any lot there shall be kept and  
maintained an open space of not less than  
twenty-five per cent. of the total area of  
such lot, except that in the case of corner  
lots with two street frontages, the open  
space may be not less than fifteen per  
cent. of the total area of such lots. In  
the business districts, all other types of  
buildings may occupy the entire lot, sub-  
ject to restrictions as to access and set-  
backs for the walls with openings.

SECTION 5. Setbacks from front  
property line.  
Residence Districts: In residence dis-  
tricts no portion of any dwelling or tenement,  
except porches, shall be erected  
within fifty feet of the centre line of the  
street on which such dwelling or tene-

ment faces, and no porch shall be erected  
within forty feet of the centre line of such  
street except that in the case of corner  
lots the street on which the narrowest  
width of lot faces shall be deemed the  
street front. In all other types of build-  
ings, no portion of such buildings shall  
be erected within sixty feet of the centre  
line of the street, except that in the case  
of a garage facing on a street at the oppo-  
site end of the lot from the main struc-  
ture, the garage shall have a setback of  
not less than ten per cent. of the depth  
of the lot, plus one-half the width of the  
street.

Business Districts: In the business dis-  
tricts no portion of any type of building  
shall project within ten feet of the curb  
line of the roadway, including the steps,  
bay-windows or other overhangs; except,  
however, that cornices over ten feet above  
the curb level may project fifteen inches.

SECTION 6. Location of buildings on  
lots.  
Residence Districts: In the residence  
districts no dwelling shall be erected less  
than six feet from any party line, except  
that in the case of pairs of houses erected  
with one party dividing wall, the said  
party dividing wall may be centered on  
one side party line only. No tenements,  
educational or public buildings shall be

### 537 Lost Licenses.

Drivers' licenses of 537 persons  
either were revoked or suspended  
in the first seven months of this  
year, while the names of 536 per-  
sons who cannot secure a license for  
a period of one year were placed on  
the blacklist, officials in the Depart-  
ment of Highways have announced.  
Of the 537 persons, 365 had their  
licenses revoked, while 137 had  
them suspended.

During the week ending July 31,  
the department revoked the licenses  
of 15 persons and placed the names  
of 19 others on the blacklist.

### Seeks Divorce.

Minnie Mae Strickler, of Nar-  
berth, through Attorney Freas  
Styer, has filed action for divorce  
from Lyman Strickler. They were  
married on May 14, 1896.

## ATTRACTIVE HOMES AT EXCEPTIONAL PRICES

**WAYNE**—On the Lincoln Highway, a stone and stucco home of 10 rooms and bath; all modern conveniences; hot-water heat. Lot 90x270, with garage space for two cars. The location insures a constantly increasing value of this property. Priced now at only \$13,000.

**BERWYN**—A new colonial stucco home, consisting of centre hall, large living room, dining room, kitchen and laundry; 4 bedrooms and bath; hot-water heat. Lot 70x270 on a high elevation. This home was built for the owner and has many desirable features that only an owner would specify. Priced for immediate sale at \$15,000.

**DEVON**—A new concrete and stucco home. The first floor has a delightful living room with open fireplace, dining room, kitchen and laundry; 4 bedrooms and bath comprise the second floor, while a good sized bedroom and a store room are on the third floor. All modern conveniences, with hot-water heat, on a lot 72x300 ft. High elevation. Property ready for occupancy and priced at \$14,000.

**WAYNE**—In the heart of North Wayne, a frame and stucco home, consisting of living room, library, dining room, breakfast room, kitchen, pantry and laundry. Five bedrooms and tile bath on the second floor. Ample store and closet space. Third floor bedroom. Hot-air heat. Beautiful corner lot with old shade, fruit and garden, and almost an acre of ground. A very desirable home in a delightful residential area. Priced at \$22,500.

**SECANE**—A fine old home of brick construction. First floor consists of a library, living room, dining room with high ceilings; kitchen, breakfast room and large porches. There are 3 master chambers and bath on the second floor, also two servants' rooms. The third floor has 4 bedrooms and a large billiard room. The lot consists of 3 1-3 acres with flowing stream, and has garage and chauffeur's quarters. An extraordinary value at \$25,000.

**NEWTOWN SQUARE**—A beautiful modern stone and stucco home. The first floor, besides the usual rooms, has a living hall 18x47 ft., with high ceiling and balcony. On the second floor are six bedrooms with two baths, opening upon the balcony hall. Ample garage and servants' quarters. Six and one-half acres of land with drives, shrubbery and shade. Rarely is such a property offered at anywhere near the price of \$35,000.

Many other suburban homes priced from \$5,000 to \$100,000 are included in our present offering.

## THE ZONING BILL

(Continued from Page Three)

erected within twelve feet of any side or rear line, nor shall it have less than twelve feet between any wings or extensions. No private garage shall be erected in front of the line of the rear wall of the dwelling on the adjoining lot exclusive of porches, sheds or bay-windows. Garages on a corner lot must be kept twenty feet from the side line of the lot in the rear if said lot fronts on a side street and set back from the centre of the side street twenty-five per cent. of the width of the said corner lot plus one-half the width of the side street, providing the setback shall not be less than thirty-five feet.

**BUSINESS DISTRICTS:** In the business districts the location of dwellings shall be the same as is set forth above for dwellings erected in the residence districts. No tenements in which openings face party line shall be erected within twelve feet of any such side or rear line, nor shall there be less than twelve feet between any wings or extensions where the openings do not face party lines; tenements may be built up to the party line. In all other types of buildings, walls with openings must be not less than five feet from the party line and not less than eight feet between the wings and extensions of such buildings.

**SECTION 7. Streets.** In the residence districts, in case of all streets that are not through streets, there shall be a court at the end with a space of not less than sixty feet in diameter. In the business districts, any new street to be hereafter opened shall be a through street with full-sized openings at the end of the street.

**SECTION 8. General definitions.** For the purposes of this ordinance the following definitions are adopted:

**DWELLING:** Any house or building or portion thereof, used primarily as the home, residence or sleeping space of not more than two families under one roof comprising:

(a) Private dwelling: A dwelling used as the home or residence of not more than one family.

(b) Two-family dwelling: A dwelling used as the home or residence of two families.

**TENEMENT.** A dwelling used primarily for the residence or accommodation of more than two families or of individuals in rooms or suites of rooms, such as an apartment house, flat house, tenement house, hotel, lodging house, dormitory, convent or club house, except private and two-family dwellings.

**PRIVATE GARAGE.** A garage housing or with a capacity of not over three motor vehicles under one roof in which space for such motor vehicles may be rented without sale of fuel or accessories.

**PUBLIC GARAGE.** Any garage housing or providing space for more than three motor vehicles under one roof or any garage wherein fuel or accessories are sold or stored for sale.

**BUSINESS BUILDING:** Any building or part of a building used solely for private business, such as an office building, bank, retail store, market, restaurant, laundry office, bakery, stable or warehouse or storehouse for the storage of furniture or such materials as are required for retail business.

**PUBLIC BUILDING:** Any building in which persons congregate for civil, political, social or religious purposes or in which persons assemble for reason of public or civic duty, such as Court House, Passenger Station, Library, Museum, Gymnasium, Exhibition Building, Lecture Hall, Church, Dance Hall, Armory, Fire House or Police Station.

**EDUCATIONAL BUILDING:** Any public, private or parochial school, college, academy or seminary, including building or portion of the same containing one or more rooms used for the assembling of persons for the purpose of acquiring knowledge or for mental or manual training.

**AMUSEMENT BUILDING:** Any building used solely and constantly for amusement purposes, such as a theatre or moving picture theatre.

**OPEN SPACE:** Space from the ground to the sky unobstructed by any bays or overhangs, other than cornices of not more than fifteen inches projection, except that in business districts such an open space in the case of dwellings or tenements may start at the roof over the first story if the first floor is used as a business or public building or as a lobby for a tenement.

**STREET:** Meaning the width of the space to be left for the roadway, curb, pavement and planting space and to be considered for this ordinance as not less than fifty feet.

**LOT:** The ground contained within the side and rear party lines and street line upon which a building is to be constructed.

**CURB LEVEL:** The mean curb level as established by the Borough Engineer on the street of highest mean elevation on which the building faces.

**STORY:** That part of the building comprised between any floor and the floor or roof next above, including any cellar or basement which is more than one-half above mean curb level.

**SECTION 9.** Except as hereinafter specified, no building, structure or premises or part thereof shall hereafter be used, constructed, reconstructed, extended or enlarged or substantially altered in its use or construction, except in conformity with the regulations herein prescribed for the district in which it is located.

The provisions of this ordinance shall not apply to any existing structure nor to the existing use of any building or premises, nor shall they require any change in plans, construction or designated use of any building or part thereof, the construction of which shall be lawfully in progress at the time of passage of this ordinance, or for which a permit shall have been issued pursuant to law or ordinance, provided it shall be started within sixty (60) days from the time of the effective date of this ordinance and be promptly and diligently prosecuted to its completion.

**SECTION 10. Penalties.** Any building or portion of a building, or party or foundation wall hereafter erected or said Borough of Narberth in violation of the provisions of this ordinance is hereby

declared a common nuisance, and the owner of the ground or the building, upon twenty-four (24) hours' notice personally served upon him or them, or a like notice being posted upon said building, in case personal service cannot be made within said Borough, shall proceed to remove the said building within the next forty-eight (48) hours beyond the Borough limits, or proceed to take down the same within that time, and in the event of his or their refusal or neglect so to do, the Chief Burgess, or in case of his absence, or failure to act, the Borough Council shall forthwith proceed to have the said building removed as a common nuisance, the necessary expense of which shall be placed upon any lot or premises within collected from the owner of said building or lot, as other debts are by law collected. Provided, That if the owner of such building shall refuse or neglect to remove the materials of which the building may be composed after the same has been deposited in some convenient place for the space of twenty-four (24) hours after notice so to do, the said materials shall be sold at public sale after six (6) days by not less than ten (10) printed bills posted in the vicinity, and the proceeds thereof paid into the Borough Treasury for the use of the owner of such building or lot after deducting all costs and expenses for tearing down, removing and disposing of same; any person violating the provisions of this ordinance or any of them, or failing to comply with them in any respect, shall be liable to a fine of not less than Twenty-five Dollars (\$25) nor more than One Hundred Dollars (\$100) in the discretion of the Chief Burgess or Justice of the Peace imposing the same, the funds to be sued for and recovered in the name of the Borough, and for thereof such debts are collected by law. And for each and every day such violation shall continue after notice has been given as aforesaid, during which the party so notified has neglected or refused to comply with the provisions of this ordinance, there shall be an additional fine of Five Dollars (\$5) per day until the nuisance is abated or the ordinance complied with.

**SECTION 11.** All ordinances or parts of ordinances inconsistent herewith be, and the same are, hereby repealed. Passed this 14th day of July, A. D. 1924.

W. R. D. HALL,  
President of Council.

Attest:  
CHARLES V. NOEL,  
Secretary of Council.  
Approved this 14th day of July, A. D. 1924.

CARL B. METZGER,  
Chief Burgess.

## Boy Scouts Know the Value of Hot Water

Cleanliness is the big thing in the Scout Code—Just as it should be in every home.

Cleanliness without hot water is next to impossible.

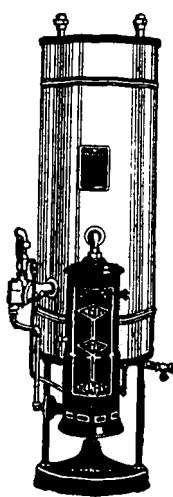

You can have plenty of hot water for all household purposes, without work or dirt, if you install a Storage Gas Water Heater.

It automatically restores the hot water as used.

And the price has been made so low that almost anyone can afford one.

The cost of operation is SURPRISINGLY low.

Phone Ardmore 17 for Representative.

## Why "Cream" Buttermilk?

A Revolution in an Old Industry and a Contribution to the Public From Pure Science

So great a change has come in the demand for Buttermilk, that every one of our customers should understand the reason. Instead of being only a hot-weather beverage, Cream Buttermilk has grown to be an all-the-year-around drink. More and more is it growing to be a necessary, as well as an excellent beverage.

There are several reasons for this increased demand.

The first reason is the great improvement in the product, due to more careful selection of the milk and to better methods in ripening.

The chief reason for the constant demand through all seasons is due to the education of many persons by the family physician to their real need for this healthful drink. Also, travelers in Europe have learned to drink Culture Milk at health resorts.

This latter knowledge has been gained from the writings of Metchnikoff, principally. Although it was Pasteur who first explained the difference between alcoholic and lactic fermentation, yet Metchnikoff carried on the investigations and showed proof of the harmful effects of alcoholic fermentation and also the great beneficial effects of lactic fermentations by the use of soured milk.

"Kowmiss" is prepared from mare's milk by the wandering tribes of Tartars of the steppes of Russia and Central Asia. Metchnikoff discovered one of these tribes who were partially intoxicated their entire lives and had never developed beyond boyhood, both physically and mentally. Their chief food was mare's milk soured with an alcoholic ferment similar to yeast.

"Yoghurt" is prepared in every household in Bulgaria, where the long lives of many are notorious. Metchnikoff found that this soured milk was prepared with great care and was a pure lactic acid fermentation, without the formation of gas.

From a large experience in the hospitals of Paris, he came to believe that pure sour milk would certainly prolong life by deterring old age.

Poisoning of the system by the toxic substances produced by injurious bacteria from various foods being digested, and causing headache, stupor, dizziness and chronic indigestion, could be prevented by lactic acid in the digestive tract produced by the daily use of pure milk soured with a pure culture of "Bulgaricus."

## THIS IS THE WAY TO PEACEFUL DIGESTION

"Cream Buttermilk" is superior to all other sour-milk drinks. Each step in the process of manufacture is carefully guarded. First, pure milk is selected and separated. This milk is pasteurized at a temperature so high that extermination of all bacteria is insured. Then the ripening process is controlled perfectly at the proper temperature and with pure cultures of Lacticus and Bulgaricus, which insures a smooth consistency and complete digestion of the casein. This also secures the presence of the two necessary agents—lactic acid and the Bulgarian ferment, and without the formation of any gas. One per cent. of pasteurized cream is added, increasing the food value and improving the flavor.

"Cream Buttermilk" surpasses the old-time churned buttermilk, which would whey-off or water so quickly, because our product is standardized and produced scientifically and because it is always clean, pure and rich in flavor.

Pure cultures of Lacticus, Bulgaricus or Acidophilus will be supplied on order.
